

Joun Abbas

FULL STACK & ANDROID DEVELOPER

New Galla Mandi, Bhakkar, Punjab, Pakistan / [+92 344 9890302](tel:+923449890302) / jounabs52@gmail.com

PROFILE

Full stack and Android developer with a year of professional experience at AiroxLab, where I build responsive websites and Android applications end to end — from layout and component work, through backend integration, to release.

My day-to-day runs from JavaScript and Next.js on the front end to PHP, SQL, MySQL and Supabase behind it, with Flutter and Dart for Android. I am most at home on database-driven features, and on applications that stay fast and behave predictably for the people using them.

TECHNICAL SKILLS

WEB	HTML5 · CSS3 · JavaScript · Next.js · Responsive layout
MOBILE	Flutter · Dart · Android development
BACKEND	PHP · Supabase
DATABASES	SQL · MySQL · Schema design · Queries
TOOLS	Git · Version control & collaboration

EXPERIENCE

Senior Website & App Developer AiroxLab

2025 — Present

- Develop responsive websites using HTML5, CSS3, JavaScript and Next.js, built to hold up across phone, tablet and desktop screens.
- Build Android applications with Flutter and Dart, from screen layout through to data and release.
- Design and query SQL, MySQL and Supabase databases, and wire them into the application features that depend on them.
- Work on application performance — faster loads, fewer wasted queries — and on the day-to-day reliability of what ships, using Git for version control throughout the delivery cycle.

EDUCATION

BS Computer Science (BSCS)

2023 — 2027

Thal University, Bhakkar, Pakistan

In progress, expected 2027 · CGPA 3.4 / 4.0
